EDUCATION

The University of Minnesota-Duluth | Duluth, MN **Expected Graduation December 2026**
B.S. in Computer Science, Minor in Management Information Systems | Dean's List
Relevant Courses: Systems Analysis and Design, Software Engineering, Advanced Writing: Engineering, IT in Business

SKILLS

Technical Skills: Python, Java, SQL, JavaScript, Dart, HTML, CSS, REST APIs, Firebase
Frameworks/Tools: Flutter, React (learning), Git, Jira, Lucidchart
Concepts: UI/UX Design, Agile/Scrum, Product Development, AI-Assisted Development (Claude, Codex, NotebookLLM)

PROJECTS

Personal Portfolio Website (AI-Assisted Development)
- Built a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase projects and technical experience
- Leveraged AI coding assistants (Claude, Codex) to accelerate development, debug issues, and improve code quality
- Implemented user-focused design principles to create intuitive navigation and clean UI/UX
- Integrated dynamic components and optimized performance for fast load times and smooth user interactions
- Deployed and iterated on the website based on usability feedback and testing

Pharmacy Systems Planning Tool | Systems Analysis and Design Project
- Collaborated with stakeholders to design a course planning system for pharmacy students throughout the University of Minnesota campuses
- Conducted user research to identify pain points in course selection and degree planning workflows
- Translated user needs into system requirements, including use case diagrams and process workflows using Lucidchart
- Proposed product features to improve decision-making and streamline course planning for students
- Iteratively refined system design based on stakeholder feedback and Agile development principles

Guiding Hang App | Northstars Group Project
- Designed and developed a mobile application to help users discover job opportunities and navigate career paths
- Identified user needs in job searching and structured features to support role discovery and user engagement
- Implemented core functionality including user authentication and real-time data handling using Firebase
- Iterated on product features through testing and feedback to improve usability and overall user experience

RELEVANT EXPERIENCE

GigHQ.ai | Product and Growth Fellow **September 2025 - December 2025**
- Selected as 1 of 10 fellows to advise an early-stage AI startup on product strategy, user growth, and go-to-market initiatives
- Conducted user research (interviews, usability testing, UI/UX audits) to identify user pain points and inform product roadmap decisions
- Designed and executed growth campaigns by developing content strategies, tracking engagement metrics, and optimizing messaging
- Built scalable playbooks for community engagement and content creation to support long-term user acquisition
- Performed market and competitor analysis, presenting insights to leadership to guide product positioning and strategic decisions

Software Engineering Learning Assistant **January 2026 - PRESENT**
- Guiding two student teams in Agile development, facilitating sprint planning, stand-ups, and retrospectives as a Scrum Master
- Translated technical concepts into clear explanations, improving team alignment and product delivery outcomes
- Supporting 50+ students in applying software engineering principles to real-world project development

Hmong Living in Unity and Balance | President **May 2024 - PRESENT**
- Leading an 8-member executive team to plan and execute large-scale events, aligning initiatives with community needs and organizational goals
- Managed a $13,000 budget, prioritizing resource allocation to maximize engagement and event impact
- Coordinated cross-functional efforts across marketing, operations, and partnerships to deliver 6+ events per semester
- Built partnerships with 20+ organizations to expand outreach and drive community growth

UMD ITSS Center | Computer Maintenance/Imaging Technician **July 2024 - PRESENT**
- Resolved 10+ weekly technical support issues by diagnosing user problems and delivering effective solutions
- Gathered user requirements and feedback to improve IT service workflows and support processes
- Configured and deployed devices using Active Directory and JAMF to ensure reliable system performance

Management Information Systems Course Grader **October 2025 - December 2025**
- Selected by faculty to support grading for upper and lower division MIS courses, reflecting trust, academic performance, and professionalism for over 300+ students
- Served as an academic support role reinforcing fairness, consistency, and transparency in evaluation processes
